Problem
The TruCluster software is not stable on Digital UNIX 4.0B. In addition, DEC has determined that, due to the overall instability of 4.0B (it requires a lot of patches) and the relative stability of 4.0D, they will no longer continue to support Digital UNIX 4.0B after the first of 1999.

Proposed Solution
Upgrade all the FOS DECs at the EDF to Digital UNIX 4.0D. Work to be performed by Doug and Colleen. Machines included in the upgrade are: boston, beepbeep, beeper, babs, buster, duey, doc, hamilton, montana, and porky.

Need date - Install on beep beep by 6/5/98 & others sequentially to fit into FOS work schedule. To be comput by 6/30/98
